#### **DETAILED ACTION**

## Specification

The disclosure is objected to because of the following informalities: the continuing information on the first page of the instant specification should be updated to reflect the current status of cited applications.

Appropriate correction is required.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of U.S. Patent No. 6,451,272 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are of the same inventive concept, namely concentration monitoring of an oxidative gas or vapor through the use of a chemical substance that reacts with the gas to produce a heat change. The structure differs on in specifying a known species of a temperature probe configuration utilizing a

thermocouple junction and voltage reading. The difficulty in achieving effective sterilization of diffusion restricted regions is well recognized and as such it would have been well within the purview of one of ordinary skill in the art to place the concentration measuring means therein to ensure that effective levels are reached and maintained.

Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 6,491,881 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are of the same inventive concept, namely concentration monitoring of an oxidative gas or vapor through the use of a chemical substance that reacts with the gas to produce a heat change. The structure differs on in specifying a known species of a temperature probe configuration utilizing a thermocouple junction and voltage reading. The difficulty in achieving effective sterilization of diffusion restricted regions is well recognized and as such it would have been well within the purview of one of ordinary skill in the art to place the concentration measuring means therein to ensure that effective levels are reached and maintained.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krisanne Jastrzab whose telephone number is 571-272-1279. The examiner can normally be reached on Mon.-Wed. 6:30am-4:00pm and alternate Fridays.

Art Unit: 1744

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
